Aennavaram Yeshwanth Reddy

aennavaramyeshwanthreddy@gmail.com | +91 8688391300 | github.com/yeshwanth371

Summary

An independent and self-motivated graduate with proven skills. Eager to embark on meaningful projects and remain at the forefront of technological advancements.

Education

2020 - 2024 B.Tech (Computer Science and Engineering) at **National Institute of Technology Andhra Pradesh**
2018-2020 Class 12th at **Abhyaas Junior College, Hyderabad**
2018 Class 10th at **Geetha High School, Toopran**

Experience

Data Engineer, **MAQ Software** 09/2024 - Present

- Successfully worked on three data engineering projects, showcasing strong expertise in designing and managing data workflows.
- Experienced in migrating projects across different technologies, ensuring minimal disruption and smooth transitions.
- Proven ability in modifying, optimizing, and integrating new features into existing projects to meet evolving business requirements.
- Played a key role in developing a custom tool for verifying code bases and pipeline source code between Development and Production environments, enhancing deployment accuracy and reducing errors.

Projects

Anomaly Classification in Surveillance videos

- Utilized advanced techniques like graph-based semi-supervised learning and multiple instance learning.
- Proposed novel formulation for multi-class classification. Enables accurate categorization of diverse anomalies with high precision.
- Fine Tuned and Extracted feature vectors from Slow-Fast network on MED dataset.

Library and Event Management System

- Developed a comprehensive Library and Event Management System catering to both library and event management needs.
- Seamlessly integrates functions for issuing books, tracking history, checking availability, accessing eBooks, announcing events, and retrieving event information.
- Ensures security through a robust website framework built with HTML, CSS, JavaScript, MYSQL and PHP technologies.

Heart Disease Prediction

- Developed a robust Heart Disease Prediction System leveraging machine learning techniques to facilitate early diagnosis and risk assessment, aimed at improving healthcare outcomes.
- Developed a dynamic website using the Django web framework.

Skills

Programming Languages	PYTHON, C, C++, JAVA, HTML, CSS, JAVASCRIPT, SQL.
Technologies	Azure, Fabric, Power BI, Databricks
Core Concepts	DSA, DBMS, OOPs.

Awards and Rewards

Spot Award

– Achieved a significant milestone by winning Spot Award for the exceptional performance.

Certifications

Implementing Analytics Solutions Using Microsoft Fabric

– Achieved a significant milestone by completing the Implementing Analytics Solutions Using Microsoft Fabric course offered by Amazon.

Languages

English **Telugu** **Hindi**

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
