INFRA PROJECTS

COMPANY
PROFILE

COMPANY INTRODUCTION

Vighna Infra Projects Private Limited (*VIP*) is a dynamic and rapidly growing enterprise specializing in Solar Photovoltaic (PV) project execution and comprehensive infrastructure development. Established in 2021, the company was founded with a visionary goal:

"To be recognized as the leading construction and solar energy solutions provider in its operating regions, driven by performance excellence, a skilled workforce, and unwavering commitment to core values."

With a solid foundation in engineering excellence and technical expertise, VIP has successfully delivered a diverse portfolio of projects across both government and private sectors. Our accomplishments span the installation and commissioning of solar power plants, construction of warehouses, and various infrastructure development projects tailored to meet contemporary industry demands.

At the core of VIP's operational strength is a team of highly qualified engineers, project assistants, and technicians, each possessing extensive domain knowledge and hands-on experience. Our multidisciplinary team delivers end-to-end turnkey solutions in setting up Solar PV-based energy systems, integrating state-of-the-art technologies and adhering to the highest quality standards.

We offer a comprehensive suite of services that covers the entire project lifecycle, including:

- Site Survey and Feasibility Analysis
- System Design and Engineering
- Structural Orientation and Planning
- Installation and Erection
- Testing, Quality Assurance, and Commissioning

VIP is committed to delivering solutions that are not only technically sound but also cost-effective, time-bound, and aligned with client-specific requirements. Our projects have served prominent stakeholders in the power transmission and distribution sectors, as well as commercial and industrial infrastructure domains.

Driven by a commitment to sustainability, precision engineering, and client satisfaction, *VIP* continues to establish a strong footprint in India's renewable energy and infrastructure landscape contributing meaningfully to the nation's green energy goals and infrastructure modernization initiatives.

DIRECTOR'S

Bharath Reddy Ramidi

Mr. Bharath Reddy is a seasoned Business Management professional with over a decade of experience in the solar energy sector. He has successfully led and delivered numerous solar projects that contribute significantly to India's renewable energy objectives. In addition to his work in solar, he has also executed projects in real estate construction, development, and infrastructure.

Mr. Bharath is a strong and pragmatic team leader, known for his ability to bring out the best in people. He consistently fosters trust-based relationships with teams, clients, and external partners, driving collaboration and long-term success.

"At VIGHNA INFRA PROJECTS, we're committed to leading the transition to renewable energy through innovative solar solutions. Building trust with our teams and stakeholders is at the heart of our mission.By fostering strong relationships based on transparency, respect, and collaboration, we drive impactful solar projects that contribute to a sustainable future"

– Bharath Reddy

Sumana Reddy Gaddam

Mrs. Sumana has a Master's degree in Business Administration from T.A.Pai Management institution, Manipal, Karnataka. She has experience in fields like Solar Energy, automobile sector and Marketing. She is excellent in strategic planning skills, driving VIP's growth and success in the solar sector. Her ability to align projects with company goals and adapt to industry trends has been key to delivering impactful solar solutions.

"Our team's dedication to excellence in renewable energy aligns with our values of trust, integrity, and partnership. Together, we're shaping a cleaner, brighter future for communities and the planet."

– Sumana Reddy

OUR SERVICES

SOLAR POWER PLANT

We offer comprehensive turnkey solutions in Solar PV installations, managing the entire project lifecycle with precision and expertise. Our services encompass every critical phase of execution, including:

- Site Survey and Feasibility Analysis
- Pile Alignment and Casting
- Supply and Installation of Module Mounting Structures (MMS)
- Solar Module Installation
- Complete AC and DC Electrical Works
- Erection and Installation of LT & HT Panels
- Inverter Duty Transformer (IDT) Installation
- Transmission Line Setup and Integration

Each stage is executed with a strong focus on quality, safety, and compliance with industry standards. Our skilled technical team, supported by modern equipment and robust project management, ensures timely, efficient, and reliable delivery for utility-scale and rooftop solar projects alike.

WAREHOUSE AND INFRASTRUCTURE

We specialize in a broad spectrum of warehouse and infrastructure development services, encompassing the construction of Civil Works , custom fabrication and installation of warehouses and storage sheds, and the installation of durable precast boundary walls and chain-link fencing for secured perimeters. Additionally, our expertise extends to the construction of high-quality residential and commercial buildings, integrating all essential civil and electrical works to ensure fully operational and compliant structures that meet the needs of both public and private sector clients.

OUR MACHINERY AND MAN POWER

At Vighna Infra Projects, we deploy a robust fleet of construction machinery including Ajax self-loading concrete mixers, crawler excavators, JCB backhoe loaders, and forklifts, all of which play a crucial role in ensuring efficient, timely, and high-quality execution of solar construction projects. These machines support key activities such as site leveling, foundation work, material handling, and structural installations.

Complementing our machinery is a highly skilled and experienced workforce consisting of engineers, site supervisors, machine operators, and technical laborers. Our manpower is well-trained in executing large-scale solar and infrastructure projects with precision, adhering to safety standards and project timelines, ensuring seamless coordination from ground execution to final commissioning.
