Summary

Azure Data Engineer and Power Platform Developer with experience designing scalable data platforms and enterprise web portals. Skilled in building ETL pipelines using Databricks and Azure Data Factory, and developing secure external-facing applications using Power Pages and Dataverse. Experienced in solution design, CI/CD automation, and Azure integrations to enable reliable data systems and modern business applications.

Education

2020 – 2024 B.Tech in Computer Science and Engineering, **National Institute of Technology Andhra Pradesh**
2018 – 2020 Class 12, **Abhyaas Junior College, Hyderabad**
2018 Class 10, **Geetha High School, Toopran**

Experience

Data Engineer, **MAQ Software** Sep 2024 – Present

- Designing and maintaining enterprise-scale data pipelines and analytics platforms on Azure to enable reliable data delivery for business intelligence and reporting systems.

GPS Platform

- Designed and enhanced ETL data pipelines processing **9+ data streams** using **Databricks**, **PySpark**, **SQL** and **Azure Data Factory**.
- Built and optimized transformation workflows in Databricks to improve pipeline performance and maintainability.
- Resolved data quality and pipeline stability issues to ensure consistent delivery of reliable datasets for downstream analytics.
- Collaborated with cross-functional engineering teams to design scalable data processing solutions and resolve production dependencies.
- Engaged with client stakeholders to clarify requirements and recommend technical improvements to data architecture.

MPL Planning

- Automated a complex planning workflow improving operational efficiency and reducing manual intervention.
- Developed interactive business intelligence dashboards using **Power BI** to support data-driven decision-making.
- Built backend data processing pipelines using **Databricks** and **Azure SQL Database**.
- Implemented data validation and quality checks to ensure reliable reporting outputs.

Power Platform / Power Pages Development (microsoftpartners.microsoft.com)

- Architected secure enterprise web portals using **Power Pages** and **Dataverse** for external-facing business applications.
- Designed dynamic data integration layers using **Liquid**, **FetchXML**, and **JavaScript** to render

Dataverse data within portal interfaces.

- Implemented role-based security architecture using **Web Roles** and **Table Permissions** to enforce controlled data access.
- Integrated **Azure Functions** to externalize business logic and support scalable backend processing.
- Designed and implemented **Azure DevOps CI/CD pipelines** to automate deployments across **DEV, UAT, and PROD** environments.

Projects

Anomaly Classification in Surveillance Videos

- Developed a machine learning solution for anomaly detection in surveillance videos using graph-based semi-supervised learning techniques.
- Proposed a multi-class classification approach for detecting and categorizing multiple anomaly types.
- Extracted feature vectors using the SlowFast network and trained models using the MED dataset.

Library and Event Management System

- Built a web-based system for managing library resources and institutional events.
- Implemented modules for book issuing, availability tracking, borrowing history, eBook access, and event announcements.
- Developed using **HTML, CSS, JavaScript, MySQL, and PHP**.

Skills

Cloud & Data Engineering	Azure, Databricks, Azure Data Factory, Azure SQL Database, Azure Synapse, Microsoft Fabric, ETL/ELT Processes
Power Platform	Power Pages, Dataverse, Power BI, Liquid, FetchXML
DevOps & Integration	Azure DevOps, CI/CD, Azure Functions
Programming	Python, PySpark, SQL, JavaScript, Java, C, C++, HTML, CSS
Computer Science	Data Structures, Algorithms, DBMS, Object-Oriented Programming

Certifications

Implementing Analytics Solutions Using Microsoft Fabric

- Certification focused on building analytics and data engineering solutions using Microsoft Fabric.

Awards

Spot Award, MAQ Software

- Recognized with the Spot Award for exceptional performance and contributions to the GPS project.

Star of the Month, MAQ Software

- Awarded Star of the Month for delivering projects on time, effectively managing client communications, leading the team to successful delivery, and contributing to team training initiatives.
